IT Modernization

- Assessments & Agile Transformation
- Enterprise Architecture & Roadmaps
- Cloud and Data Center Management
- Software and Mobile Development
- Predictive Analytics

Past Performance

Federal Customers & Expertise

Commercial Customers & Partners

Support for Platform Engineering and DevOps Integration (SPEDI)

Department of Homeland Security (DHS)

Contract: IZ-SPEDI-16-052 | Performance Period: 10.01.2016 - Present | NAICS: 541511

WINtrio successfully accomplished numerous tasks for US Citizenship and Immigration Services (USCIS) including but not limited to broad range of Cyber Security Services (Security Control Assessments (SCA), ISSO, Vulnerability and Incidents Management, Penetration Testing), DevSecOps services (Cloud Migrations and Data Centers Management, fully automated Systems' monitoring, and Systems Design), and operational support services (software, infrastructure, and data). We provide support for their 65+ complex systems and perform security scanning for their 80k IT assets monthly. Our automated approach towards deployments, cloud provisioning, and security scans delivers tremendous costs savings and improved productivity.

WINtrio is a very valuable asset to the Enterprise Infrastructure Division Security (EID). They work tirelessly to meet all security objectives within the agency. They make sure that all requirements are met, DHS security controls are enabled, and that compliance is current. Without WINtrio, EID would be in a lot of trouble.

-- IT Specialist, Enterprise Infrastructure Division(EID), DHS/USCIS

Walmart Development, Development Operations, and Support Contract

Walmart Innovations Lab

Contract: WM-DevOps-001 | Performance Period: 01.26.2018 - Present | NAICS: 541511

WINtrio provides a broad range of IT services for Walmart CONUS and OCONUS teams. Our services include systems and security architecture, Cloud and DevOps transformation, Software and Mobile Apps Development, Networks Management and fully automated systems' monitoring, Predictive Analytics, and Help Desk services. While providing support to client's 50+ app teams, our effective Project Management, Business Process Reengineering (BPR) techniques coupled with the domain knowledge and on-demand training enabled the client to minimize waste and meet their mission objectives within scope, schedule, and cost.

WINtrio has been on Walmart project only for few months. But what I have seen is all praises. The team takes responsibility, speak out their concerns, work hard and they have ramped up faster than everyone's expectations. Great job!

-- SVP Professional Services Confiz/Walmart Account

Healthcare Federal Employee Program Operations Center (FEPOC) Modernization

Federal Employee Program Operations Center (FEPOC)

Contract: ALTA ITS-7861 | Performance Period: 10.16.2019 - Present | NAICS: 541618

WINtrio has been instrumental in helping FEPOC establish a viable and effective strategy to migrate off of legacy/mainframe healthcare apps encompassing some of the most critical business functions like members' Enrollment, Claims, and Customer Services Management. FEPOC has 30+ business apps with Personally Identifiable Information (PII), healthcare data, and financial details. By leveraging our intimate healthcare knowledge, technical expertise, and proven playbooks, we have partnered with FEPOC in developing a methodical approach to modernize some of their key applications resulting in significant cost savings, improved stakeholders' satisfaction levels, and enhanced productivity.
